ANNOUNCEMENT!!

Aris Energy Solutions has been selected as the lead provider of the SOLIDpower fuel cell technology in to the US, starting with the NYC/Tri-State area. This initiative is spearhead by two senior energy commercial and technology leaders in the NYC markets, Lou Lombardozi and Steve Almeida. Lou's background and role with Aris Energy Solutions follows:

Aris Renewable Energy is proud to announce recent talent addition to its leadership. Lou Lombardozi, brings over 30 + years of utility and energy project development and implementation experience. Lou started his extensive energy career as a Plant Engineer, both in Nuclear and Fossil Fuel Power Plants. Lou is considered an expert in Thermodynamics and Heat Transfer, for which he possesses 2 patents. His capacities included Design and Engineering Analysis of energy systems. He then transitioned into the Energy Service Project Development & Management Group, spanning 15 years, while at NYPA. Bringing significant value to NYPA customers sharing a vast knowledge of HVAC Systems,

including NYC- Dept. of Citywide Administrative Services, who oversees all NYC agencies - his portfolio represented the implementation of capital projects totaling \$455M.

Lou's expertise as an Administrator/Operator included vendor selection, bid selection, contract award and reconciliation. He also ensured regulatory compliance with local laws. Lou brings widespread leadership to Project Development – having served in construction/commissioning, project scope/design with an emphasis on project finance – risk mitigation via energy savings analysis, while implementing cost controls.

He then onboarded at Con Edison, serving as a Sr. Specialist in the Commercial & Industrial Program. His role morphed into a trusted SME [subject matter expert] within the Energy Efficiency Department for large customers. Working with respective Corporate Facilities/Engineering personnel, Lou further established himself as a team player bringing value to customers, working towards resolve on many energy infrastructure issues with a focus on HVAC, Air Handlers, Variable Frequency Drives, Building Management Systems, while determining space allocation for Distributed/On-Site Generation.

Lou joins Aris Energy Solutions, LLC as the Sr. Project Manager – Fuel Cells & CHP. His duties include business/project development while implementing best in class renewable technologies [Fuel Cells, CHP, Batteries, Solar, Wind and Utility-side Demand Management, Demand Response according to NY State's REV [Reforming Energy Vision] Mandate.

Aris is an Energy Services Company which achieves energy efficiency savings, enhances and extends customer implementation of Renewable Energy via our product line, while helps to celebrate your commitment to Sustainability with clients & stakeholders alike.
