

Aris Energy Solutions Now An Eligible Dealer for NYSERDA Incentives for Yanmar “CHP Systems”

YANMAR 35 kW - CHP

Aris Energy Solutions proudly announces that it is now an approved NYSERDA Vendor for the Yanmar Combined Heat and Power (CHP) System.

The YANMAR 35 kW Combined Heat and Power (CHP) systems can meet the needs for a variety of “on-grid” and “off-grid” applications, including commercial, multi-family and residential facilities that have a significant thermal load. Additionally, the Yanmar 35kW CHP system can be supplied with a “Black Start Capability” that provides 35kW of electric resiliency against grid outages in addition to its high efficiency continuous production of heat and power.

Stephen Almeida, Aris’ Director of Fuel Cells and CHP comments “As we target the downstate New York users, we acknowledge the fine work of both NYSERDA and Con Edison to help develop the emerging micro-CHP market in our own backyard.”

About Aris Energy Solutions:

Aris Energy Solutions' mission is to provide grid tied and off-grid CHP solutions that reduce our clients' energy bills, increase their facility reliability and resiliency, while improving the comfort level of their buildings. Please contact us to discuss how Aris can bring best in class energy solutions to your facility.
